FROM THE DIRECTOR'S DESK: HIGHLIGHTS OF 2024-25

As the new Director of the Institute of Economic Growth (IEG), I am truly honoured and privileged to present the Annual Report for the year 2024-25. This has been a remarkable year for IEG, marked by path-breaking research, policy contributions, capacity-building initiatives, and strong collaborations with national and international partners. Upholding its legacy of academic excellence, IEG has continued to drive evidence-based research and shape policies addressing India's most pressing developmental challenges.

Among the major achievements, IEG co-organised the flagship Kautilya Economic Conclave (KEC) 2024 with the Ministry of Finance on the theme “The Indian Era”. The conclave was graced by the Prime Minister, Shri Narendra Modi, who spoke on India's journey towards becoming a global economic powerhouse, the importance of self-reliance, innovation, and sustainable growth, and the role of youth and technology in shaping the future of the nation. In November, the Institute organised the first Winter School on Causal Inference. The Winter School saw enthusiastic participation from young scholars from all over India. Guided by IEG faculty, they learnt cutting-edge skills for modern empirical research. Multiple Memorandums of Understanding (MoUs) signed during the year laid the foundations for producing policy-relevant research in collaboration with the Sixteenth Finance Commission, AIIMS Jodhpur, and the Abhinav Bindra Sports Medicine and Research Institute (ABSMARI), among other eminent institutions.

IEG continued its duties of building the knowledge-capacity of Officer Trainees from the Indian Economic Service. Additionally, the institute collaborated with the Directorate of Family Welfare, Government of Delhi, on three “Training of Trainers” initiatives related to the Anaemia Mukt Bharat initiative, adolescent-friendly health clinics, and safe immunisation practices.

A Technical Symposium, “Towards a Resilient Economy” was organised by the Institute on 6–7 December 2024. As part of the symposium, an IEG–IIC Panel Discussion on “Building a Resilient Economy: The Challenges of Inequality” was held on 7 December 2024, featuring

Sabyasachi Kar
Director, IEG

distinguished international speakers Dr. Stéphane Hallegatte (World Bank, Washington, D.C.) and Dr. Radhika Khosla (Oxford University).

It is also a matter of pride that Prof. Bina Agarwal has been awarded the First Global Inequality Research Award 2024/25, conferred jointly by the Paris School of Economics (PSE) and Sciences Po, France.

Distinguished workshops and dialogues were also organised during the year. In collaboration with the Yale Inclusion Economics India Centre, the Institute organised two workshops—one on “Gender and Growth Gaps in India”, and another on “Women in Leadership in Economics”. Under the Tata Chair of Information Technology and the HDFC Chair of Banking and Finance, IEG organised the “First Annual Workshop on Finance and Markets”, with keynote speakers from the Queen Mary University of London and the Indian Statistical Institute (ISI). A brainstorming workshop on “Heat Wave Adaptation Interventions for Slum Dwellers” was held in November at the India International Centre (IIC). The workshop discussed the impact of heat stress on Delhi's informal workers and policy interventions to address the issue. A conference on “Population, Health, and Development: Perspectives from Eastern India” was organised in collaboration with Utkal University, Bhubaneshwar, Odisha, along with the 12th Annual Indian Health Economics and Policy Association (IHEPA) conference titled “New Paradigms in Health Economics and Policy”, held at IIC. The fourth IEG-Sage lecture in the “Contributions to Indian Sociology” series, titled “Feverish Financial Systems, Physician Bankers, and Ailing Markets” was delivered by Prof. Kath Weston of the University of Virginia.

Over 25 academic seminars were held at the Institute on a wide variety of topics including public health, labour markets, climate change, agriculture, inequality, gender, monetary policy, international economics, and digital governance. The speakers included renowned domestic and international scholars. Out of these seminars, six were organised under the HDFC and Tata Chairs on topics like the impact of FinTech and emerging new technologies on employment, global value chains, the economic effects of banking shocks, and the changing nature of leverage among Indian corporates.

Other important events organised by IEG strengthened community engagement and social responsibility. These included the celebration of Prof. V.K.R.V. Rao's birth anniversary, International Yoga Day, World Population Day, a tree plantation drive under the “Ek Ped Maa Ke Naam” campaign launched by the Prime Minister as part of World Environment Day, a cleanliness drive, and a condolence meeting in the memory of Dr. Manmohan Singh held at the Institute.

Collectively, IEG faculty published more than 30 journal articles, working papers, policy briefs,

research reports, and book chapters during the year. I would like to thank them for their valuable contributions to the creation and dissemination of new knowledge, and for their service towards the Institute.

I would also like to thank my predecessor, Prof. Chetan Ghate, who was instrumental to many of the achievements listed in this report.

Moving forward, IEG is committed to continuing to produce frontier research on India's socio-economic transformation, expanding international partnerships, enhancing training programmes to bridge research and policymaking, and advancing the knowledge necessary to drive inclusive and sustainable growth. I extend my sincere gratitude to the Governing Body, faculty, staff, research scholars, and institutional partners whose tireless efforts and dedication continue to strengthen IEG's standing as a premier institution of policy-relevant research and academic excellence. Together, we remain committed to advancing IEG's vision and contributing to India's economic future.

ABOUT THE INSTITUTE

The Institute of Economic Growth (IEG), founded by V.K.R.V. Rao, is an autonomous centre for advanced research and training in economic and social development. With a faculty of about 22 social scientists, it conducts cutting-edge research that evolves with new questions and methods, and many of its former and current faculty have contributed to national policymaking bodies. IEG's past leadership has included eminent persons such as C.D. Deshmukh, C. Rangarajan, Bimal Jalan and Manmohan Singh. During 2024-25, N.K. Singh was the President of IEG Society and Ramesh Chand was the Chairman of the Board of Governors (BoG). Chetan Ghate and Sabyasachi Kar (since February 2025), were the Directors during this period.

Supported by the ICSSR and other government ministries, IEG runs major research and training programmes, including that for the Indian Economic Service. The institute has also undertaken research projects supported by agencies such as the World Bank, UNDP, ILO, WHO, IUCN, DFID, IDRC, CIDA, Ford Foundation, the Bill and Melinda Gates Foundation, SANDEE and the ICSSR. Although the Institute does not conduct a Ph.D. programme, nearly 100 students have been awarded Ph.D. degrees under the guidance of IEG faculty. The institute, together with the Ministry of Finance, Government of India, now jointly organises the annual Kautilya Economic Conclave (KEC).

Research and training activities at the institute are organised at various units, centres and chair units of the Institute.

Agricultural Economics Research Unit

The unit works closely with the MoA & FW and has played a key role in India's agricultural policy research—from early Green Revolution studies to current work on prices, climate change, rural transition and farmer welfare. It has also evaluated major government programmes, including RKVY and the natural resource management component of MGNREGA.

Development Planning Centre

The unit, set up with support from the erstwhile Planning Commission, focuses on macro-econometric modelling and research on growth, structural transformation, financial markets, political economy, income distribution, and climate-energy economics.

Environmental and Resource Economics Unit

IEG has pioneered environmental and resource economics in India since the 1980s, established with Ford Foundation support. Its research spans ecosystem valuation, climate change

economics, and current work on heat stress and the economic and health impacts of heat-adaptation measures.

Health Policy Research Unit

The unit, established with Ford Foundation support, applies economic analysis to health sector challenges and collaborates with government and NGOs. Its research covers health economics, financing, healthcare demand, poverty, disease economics, and cost-effectiveness analyses.

Indian Economic Service (IES) Unit

The IES Unit has trained newly recruited and in-service Indian Economic Service officers for the Ministry of Finance, focusing on economic policy, planning and analytical skills. This initiative has been renewed under a five-year agreement signed with the Department of Economic Affairs in December 2024. The Unit also undertakes research in labour, finance, trade, manufacturing, competition, ecological economics, climate change and data analysis.

Population Research Centre (PRC)

The unit funded by the Ministry of Health and Family Welfare, conducts research on fertility, family planning, migration, reproductive and child health, ageing, and the population–development–environment nexus, contributing to major surveys like NFHS and DLHS.

Reserve Bank of India (RBI) Endowment Unit

Established with an RBI grant, the RBI Unit focusses on research on macroeconomics, international economics and development economics.

Social Change and Social Structure Unit

The Social Change and Social Structure Unit, evolving from the UNESCO-supported Asian Research Centre, conducts research on development, religion, gender, kinship, tribal livelihoods, social policy, environment, media, culture and democracy. It also publishes the renowned journal Contributions to Indian Sociology.

HDFC Chair Unit

The unit supports research in banking and finance, macroeconomics, monetary and financial economics, market regulation, and related areas.

सत्यमेव परमो धर्मः

Tata Chair Unit

The unit promotes research on ICT and its role in productivity, growth accounting, information economics, policy and regulation, industrial structure, service-sector growth and telecommunications.

RESEARCH ACTIVITIES

The main thrust of IEG's research is on the development of India's economy and society. Faculty members work on both conceptual and empirical issues with strong policy relevance. The research programme is revised periodically to incorporate new areas of interest. Many faculty members work on more than one theme.

3.2

ONGOING PROJECTS AND STUDIES

Dr. Khushboo Aggarwal
Assistant Professor

(With Purnamita Dasgupta), 'Economic and Health Impact Assessment of Heat Adaptation Action: Case Studies from India', funded by Wellcome Trust, date of initiation: (date of initiation: August 1, 2023, likely date of completion July 31, 2028.

This research study will provide inputs for improving the capacity of communities and vulnerable persons to cope with heat. It aims to come up with policy-relevant findings to inform policies and programs on how best to reduce health risks from heat stress and to identify measures for adaptation to heat. In particular, it will focus on managing

heat stress to protect the health of children, the elderly, and outdoor workers. The study shall assess both ongoing and newly proposed interventions for reducing health risks and, the associated economic benefits and costs for managing heat stress in India.

Study on the Status and Impact of Finance Commission Grants to Rural Local Bodies', funded by Sixteenth Finance Commission, date of initiation: January 2025, likely date of completion: June 2025.

How the Finance Commission transfers have changed over the years impacting the rural local bodies finances and socio-economic development the rural local government.

Dr. Parma Chakravarti
Assistant Professor

Dr. Archana Dang

Assistant Professor

The work focuses on four major partner countries—Brazil, India, Indonesia, South Africa—from three different continents, with significant opportunities for mutual learning. All four countries are classified by the World Bank as middle-income countries, and taken together they account for about one-fourth of the world's population. The partners' projects have been prioritised according to their national and international policy relevance. These individual projects will be enhanced by cross-cutting methodological economics research and practical policy guidance. Close engagement will take place with policymakers, communities and other stakeholders throughout the development and communication of the research to ensure that the findings inform key areas of policy and have direct benefits for population health. Four policy themes and four methodological themes (policy impact, equity analysis, economic evaluation, and political economy) have been identified for the body of research that will take place over the five years.

(with Indrani Gupta and Shreyansh Raizada), '*Does Distance Matter in Out-of-pocket Expenditure on Health? Evidence from a Primary Survey in Meghalaya, India*', funded by National Institute of Health Research (NIHR), date of initiation: January 2024, likely date of completion: June 2025.

This study examines the association between distance to healthcare facilities and out-of-pocket expenditure (OOPE) on primary care in Meghalaya, a hilly state in Northeast India. Using data from a primary household survey conducted across three districts in 2024, we analyse health care-seeking behaviour and spending patterns in a region covered by the Megha Health Insurance Scheme (MHIS), which includes outpatient care. Despite the presence of universal health coverage, geographic barriers—particularly distance—continue to significantly influence healthcare costs. The findings highlight the need for improved physical access to health services in difficult terrains to reduce financial burdens and enhance equitable healthcare delivery.

Dr. Saudamini Das
Professor

Impact of Externally Funded Projects on Women Empowerment, Poverty, and Climate Change Adaptability of Vulnerable Coastal Communities: A Comparative Study on India and Tanzania', funded by Environment for Development (EfD) Initiative, University of Gothenburg, Sweden, date of initiation: January 2023, date of completion: December 2024.

UNFCCC's Adaptation Fund Board (AFB) is helping developing countries to adapt to climate change by financing adaptation projects globally, but the net impacts on beneficiaries across countries are never compared. This study will evaluate and compare the outcomes of two similar projects, implemented in

India and Tanzania, to address coastal vulnerability and improve women's empowerment. The study uses the Multidimensional Poverty Index (MPI) and the Women's Empowerment Index (WEI) to measure the program impacts. The econometric approaches are DID and PSM for MPI, and only PSM for WEI, by taking the beneficiary households as treatment and two types of control households, non-beneficiary households from project villages and households from non-project villages. Villages/wards from Krishna district in India and Kingamboni district in Tanzania are being studied.

(PI, with Co-PIs—R. K Kolli, IITM, Pune, Arabinda Mishra, DEFT, Bhubaneswar, Rajib Dasgupta, Meeta Mehra, JNU, Kristie L. Ebi, University of Washington, Clare Heaviside, University College London, William Joe, IEG; implementation partner: IIHMR University, Jaipur)

'Economic and Health Impact Assessment of Heat Adaptation Action: Case Studies from India', funded by Wellcome Trust, date of initiation: August 1, 2023, likely date of completion July 31, 2028.

Heat Stress is a growing concern in India and effective interventions are needed to protect those most at risk. This multidisciplinary and collaborative research project combines qualitative and quantitative methods to assess the magnitude, patterns and determinants of heat stress-related economic and health impacts in India. It will also pilot and evaluate additional (household) adaptation measures for reducing heat-related health risks in children, the elderly, and outdoor workers,

Dr. Purnamita Dasgupta
Professor

specifically among selected urban communities in Bhubaneswar (Odisha) and Jaipur (Rajasthan). The economic effectiveness of interventions will be estimated and policy-relevant insights derived, working in close co-ordination with stakeholders.

(with Indira Devi, Kerala Agricultural University, and Monalisa Sen, ICLEI India) 'Integrated Approaches for Sustainability: Economics of Pokkali Farming in Kerala, India', individually initiated, date of initiation: March 2024, likely date of completion: June 2026

This study will present an empirical analysis of the economic feasibility and sustainability considerations related to Pokkali cultivation in Kerala, a traditional practice of integrating paddy and fish/prawn farming. The analysis is based on data collected through a primary survey. The primary survey used a mixed methods approach to understand the complementarities and the scope for improved outcomes. Quantitative data-based estimates such as cost-benefit from alternative production scenarios are computed. The study will provide policy insights on how the system can be managed to realise its potential as a self-sustaining system, wherein economic feasibility is achieved along with conservation goals.

(with Kavi Kumar, Upasna Sharma and others), Review of Adaptation to Climate Change in the Agriculture sector', funded by MoEFCC, led by COE IIT Delhi, date of initiation: January 2025, likely date of completion October 2025.

This review will support the government of India on climate change adaptation planning for the agriculture sector. The report brings together domain experts from around the country to discuss urgent priorities for the agriculture sector with academically rigorous and evidence-based inputs; assess the impacts of and adaptation to climate change to facilitate appropriate policy planning and actions; and address gaps in the knowledge and capacities of stakeholders that must be filled to support sustainable planning.

The work is anchored at the Center of Excellence at IIT Delhi under the aegis of the Ministry of Environment Forests and Climate Change (MoEFCC), GoI.

Dr. Oindrila De
Assistant Professor

(with Debdatta Saha), 'Regulating Digital Platform Ecosystem: Role of Competition Law', individually initiated, date of initiation: October 2024, likely date of completion: March 2026.

This paper critically examines the debate on digital market ex-ante regulatory measures vs. ex-post digital competition law enactment through the lens of platform ecosystem perspectives. We review the platform ecosystem and competition literature spread over economics, strategic management and information system, and apply graph theory to evaluate the nature of competition between core platform and various participants of the ecosystem. The objective of this research is to apply this

framework to real world big platform ecosystems, analyse their current competitive structure, and inform the policy as effectively as possible.

Looking for Greener Pastures: Examining the Effect of Graduate Politicians on Forest Cover in India', individually initiated, date of initiation: October 2022, likely date of completion: May 2024

(with Upasak Das, University of Manchester, and Shreya Biswas, BITS-Pilani, Hyderabad) 'Looking for Greener Pastures: Examining the Effect of Graduate Politicians on Forest Cover in India', individually initiated, date of initiation: October 2022, likely date of completion: May 2024.

Forests are vital for environmental and health benefits, making forest management a top priority for policymakers. Using datasets that combine remote sensing forest data and temporal state assembly election information, we investigate the role of graduate politicians in promoting growth of forest cover in India. We employ regression discontinuity design using close elections between graduate and non-graduate politicians to tease out the causal effects. Our findings reveal a significant increase in forest cover growth in constituencies led by graduate politicians. On exploring the reasons, we find that higher aggregate demand for forest products across the country can be one of the drivers of the increase in forest growth. This increase in forest growth also explains why constituencies led by educated politicians may tend to show higher growth in economic activity and exhibit increased employment opportunities in

Dr. Sandhya Garg
Assistant Professor

सत्यमेव परमो धर्मः

forest-related industries. Nevertheless, we also provide suggestive evidence highlighting the possibility of environmental awareness among educated leaders driving their forestation efforts.

Dr. Chetan Ghate
Director up to February 6,
2025, IEG

(with Lakshmi Aerath, University of Liverpool, UK, and Simran Kaur, Panjab University, Chandigarh), 'Whether Women Entrepreneurs are Active Entrepreneurs: Evidence using Time-Use Survey of India', individually initiated, date of initiation: December 2023, likely date of completion: July 2024.

(with Ojasvita Bahl), 'Informality, Taxation, and Public Debt', individually initiated, date of initiation: April 2022, likely date of completion: December 2025.

Many governments have undertaken fiscal consolidations to reduce their levels of public debt in the aftermath of COVID-19.

This study explores the general equilibrium effects of fiscal consolidations in economies with large informal sectors.

(with Mohammed Arbaj, UBS, Rishabh Chowdhury, World Bank). 'Forecasting Core Inflation in India: A Demand Perspective', individually initiated, date of initiation: April 2023, likely date of completion: December 2025.

We propose a novel approach to forecasting core inflation in India, whose average contribution to headline inflation has been about 55 percent since January 2016. Our approach involves using the dis-aggregated components of core inflation, as well as the construction of a demand index using high frequency (HF) indicators. We find that individually forecasting and then aggregating core CPI components improves the short-term forecasting accuracy of core inflation. However, forecasting aggregate core inflation directly is more effective for longer horizons. We estimate a demand index using high frequency indicators. We find that the inclusion of the demand index and other co-variates enhances forecasting efficacy by capturing demand-side factors specific to the Indian economy. We also find that an accurate specification of the disaggregate components model contributes to maximising prediction accuracy.

(with Piyali Das, NIPFP, and Subhadeep Halder, ISI, Delhi and NYU Abu Dhabi), 'Fiscal Dominance and the Maturity Structure of Debt', individually initiated, date of initiation: February 2022, likely date of completion: April 2025.

We develop a dynamic model of monetary-fiscal interactions and government debt and introduce a novel channel of fiscal dominance through the maturity structure. Faced with an expansionary fiscal policy shock, extending debt maturity by the debt management office becomes a strategic tool for maintaining debt sustainability without immediate price-level adjustments by the monetary authority. To validate the results empirically, we assemble a novel central government security level dataset between 1999 and 2022 for India. Using Leeper (1991) to classify periods of fiscal and monetary dominance, we find that the probability of issuing a long-term security is approximately 7 percentage points higher in a fiscal dominant regime compared to a monetary dominant regime. Using the approach in Hall and Sargent (2011) for debt-decomposition, we show that the nominal return on marketable and non-marketable debt is the largest component driving public debt increases in periods of fiscal dominance between 1999 and 2022. Our paper highlights the 'maturity-structure' channel of fiscal dominance, and provides a framework to quantify the impact of fiscal dominance on the interest-rate burden of sovereign debt in a large emerging market economy.

Dr. Nilabja Ghosh
Professor

(with Rajeshwor, Alka M. Singh, Yashika Rani, and Amritanshi Preeti), 'Forecasting Agricultural Output using Space, Agrometeorology and Land based Observation' (FASAL-2), funded by Ministry of Agriculture & Farmers Welfare, Government of India, date of initiation: 2005, likely date of completion: 2024-25.

The FASAL project generates early crop yield forecasts for the Ministry of Agriculture using econometric modelling, informing Government of India estimates. It currently delivers monthly state-level yield forecasts, and future development, leveraging automation, and aims for greater accuracy. This will support better decision-making on exports, imports, and logistics through a comprehensive, integrated methodology involving econometrics, other scientific methods, field insights, and inter-departmental collaboration. Automated district-level yield forecasts are being implemented.

(with Prakash G. Athare and Akash V. Mhaskey), 'Concurrent Evaluation of the National Agriculture Market (e-NAM)', funded by Ministry of Agriculture & Farmers Welfare, Government of India, date of initiation: 2024-25, likely date of completion: 2025-26.

Secondary data on e-NAM mandis has been obtained from the Ministry and is presently being

सत्यमेव परमो धर्मः

validated. Analysis of Agmarknet prices for selected markets is currently underway.

The present study was undertaken to understand the various problems and constraints at the ground level related to e-NAM, particularly from the farmers' perspective, along with evaluating the performance of the scheme. Based on the responses and feedback from farmers, the study aims to support corrective actions and suggest modifications to the e-NAM software to make it more farmer-friendly. Additionally, the findings will provide useful inputs to the e-NAM-implementing states and union territories to facilitate the change management process. To this end, we have prepared questionnaires for farmers and traders and have finalised the corresponding sampling framework. Additionally, discussions have been held with relevant officials from the Ministry and SFAC, who have been requested to provide secondary data on e-NAM. Furthermore, we are analysing agricultural market prices which will further benefit e-NAM-related data analysis.

Dr. Gudakesh
Assistant Professor

(With Purnamita Dasgupta), 'Economic and Health Impact Assessment of Heat Adaptation Action: Case Studies from India', funded by Wellcome Trust, date of initiation: August 1, 2023, likely date of completion July 31, 2028.

This research study will provide inputs for improving the capacity of communities and vulnerable persons to cope with heat. It aims to come up with policy relevant findings to inform policies and programs on how best to reduce health risks from heat stress and to identify measures for adaptation to heat. In particular, it will focus on managing the heat stress to protect the health of children, the elderly, and outdoor workers. The study

shall assess both ongoing and newly proposed interventions for reducing health risks and, the associated economic benefits and costs for managing heat stress in India.

'Health Financing for UHC in Challenging Times: Leaving No-one Behind', funded by National Institute for Health & Care Research (NIHR), date of initiation: September 2022, likely date of completion: August 2027.

The work focuses on four major partner countries from three different continents—Brazil, India, Indonesia, South Africa—with significant opportunities for mutual learning. All four countries are classified by the World Bank as middle-income countries, and taken together they

Dr. Indrani Gupta
 Professor (Retired)
 w. e. f. Feb 28, 2025

account for about one-fourth of the world's population. The partners' projects have been prioritised according to their national and international policy relevance. These individual projects will be enhanced by cross-cutting methodological economics research and practical policy guidance. Close engagement will take place with policymakers, communities and other stakeholders throughout the development and communication of the research to ensure that the findings inform key areas of policy and have direct benefits for population health. Four policy themes and four methodological themes (policy impact, equity analysis, economic evaluation and political economy) have been identified for the body of research that will take place over the five years.

'Fiscal Restructuring and its Implications on Health Sector: An Analysis of State Budgets with Focus on UP and Bihar', funded by Bill and Melinda Gates Foundation (BMGF), date of initiation: October 2015, likely date of completion: September 2026.

Following the 14th Finance Commission (FFC) recommendations and its subsequent acceptance by the Government of India, tax devolution to states from the divisible pool with a simultaneous reduction in Plan outlay in the current Union budget, to accommodate the increased tax devolution took place. The project examines over the years whether and how the ensuing changes could have had an impact on social sector programmes, especially the health sector. It has been successful in building up a database for health budgets for 10 years, which has been analysed from various angles.

(with Archana Dang and Shreyansh Raizada), 'Does Distance Matter in Out-of-pocket Expenditure on Health? Evidence From a Primary Survey in Meghalaya, India', funded by National Institute for Health & Care Research (NIHR), date of initiation: December 2024, likely date of completion: June 2025.

This study examines the association between distance to healthcare facilities and out-of-pocket expenditure (OOPE) on primary care in Meghalaya, a hilly state in Northeast India. Using data from a primary household survey conducted across three districts in 2024, we analyse health care-seeking behaviour and spending patterns in a region covered by the Megha Health Insurance Scheme (MHIS), which includes outpatient care. Despite the presence of universal health coverage, geographic barriers—particularly distance—continue to significantly influence healthcare costs. The findings highlight the need for improved physical access to health services in difficult terrains to reduce financial burdens and enhance equitable

सत्यमेव परमो धर्मः

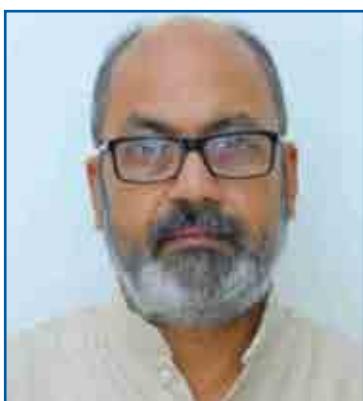

healthcare delivery.

(with Kanksha Barman), *'Public Financing for Universal Health Coverage: Examining the Role of Democracy, Freedom, and Effective Governance'*, individually initiated, date of initiation: February 2023, likely date of completion: August 2025.

Health outcomes are influenced by myriad factors, played out in complex and interactive ways. The political environment in which individuals live affects every social determinant of health directly or indirectly. There is evidence that democracy is conducive to human development; inclusive participation in government empowers ordinary citizens and holds governments more accountable to their interests. There is relatively less research on how exactly the political system of a country affects health outcomes and what some of the key intermediate variables that affect the resultant outcomes could be. In this study, selected databases on democracy, freedom and effective governance are used for 175 countries to track changes in country status in each of these parameters in the recent past. Further, regression equations are used to model the determinants of public financing for health in three variants, with each of these variables as explanatory variables in addition to other determinants of public financing for health.

(with Mayur Trivedi), *'Understanding Poor Outcomes – High Investment Paradox in Meghalaya'*, funded by National Institute for Health & Care Research (NIHR), date of initiation: November 2024, likely date of completion: July 2025.

This paper aims to examine the trends and patterns in health outcomes and health expenditure over the past two decades in Meghalaya, with the aim to investigate the factors contributing to observed variations in health expenditure, focusing on periods of significant increases or declines. This is in the context of poor health outcomes despite the high investment in health in Meghalaya. The aim is to provide evidence-based recommendations for improving health expenditure efficiency to address disparities in health outcomes in Meghalaya.

Dr. Brajesh Jha
Professor

(with Prakash G. Athare; now Nilabja Ghosh with Prakash G. Athare), *'Concurrent Evaluation of National Agriculture Market (e-NAM)'*, funded by Ministry of Agriculture and Farmers Welfare, initiated in: March 2023.

Historically, digital platforms like e-Choupal of ITC, and Rashtriya e-Market Services (ReMS) of Karnataka, have promoted transparency in transaction of commodities. On similar lines, the Government of India launched the National

Agriculture Market (e-NAM) in 2016. The government has also spent significantly on the implementation of the same. After some years of its launch, the government wants to assess the working of e-NAM at the farmers' level. This assessment has been assigned to AERU-IEG, New Delhi. The concerned division (Division of Agricultural Marketing in the Ministry of Agriculture and Farmers' Welfare (MoA&FW) has provided a short questionnaire of four pages, for farmers only. There have been many meetings (online and offline) and correspondence in relation to evaluation of e-NAM, but the work (evaluation) has not yet started. It was with me from March 2023 to January 2025. Now this is looked after by Dr. Nilabja Ghosh and Prakash Athare.

Dr. William Joe
Assistant Professor

'Concurrent Monitoring and Technical Support for Anemia Mukt Bharat and Nutrition', funded by UNICEF India, date of initiation: January 2025, likely date of completion: December 2025.

This project provides research and analytics support for the AMB programme and the SAM programme towards improving the implementation processes and assessment of outcomes. It also provides supportive supervision through quarterly progress reviews and the reporting of establishment and implementation-related issues to the nodal ministries and state departments.

Further, it examines the status of the distribution of IFA supplements at the state level and presents score cards for state-level coverage performance. Under this project, the AMB Dashboard, with key performance indicators identified under the AMB strategy at the state and district levels, is regularly updated.

'Anemia Sub-national Exemplars', funded by International Aids Vaccine Initiative, date of initiation: January 2023, likely date of completion: December 2025.

The project will conduct core research to accomplish the following objective: Determine the policy drivers (factors, policy choices, intervention strategies) of anemia decline in women of reproductive age (WRA) (i.e., inclusive of pregnant and lactating mothers (PLM) and adolescent girls (age 15-19)) and children 6-59 months of age in exemplar regions within India during the period 2000-2020 (with a special focus on 2015-2020).

Dr. Sabyasachi Kar
Professor

(With Kumar Rohit), 'Macro Monitoring and Forecasting', RBI Chair Unit, date of initiation: March 2025 likely date of completion: March 2027.

This project attempts to develop a systematic framework to monitor and forecast macro variables using high-frequency and regular national income data.

(P.I. with Co-PIs: P. Geetha Rani, NIEPA, A. Kalaiyaran, MIDS), Study on the Education Sector for the XVI Finance Commission (IEG–NIEPA–MIDS consortium), funded by the Sixteenth Finance Commission (MoU/ToR dated 14 Jan 2025), Awarded and initiated in the 2024–25 cycle; planned duration six months from agreement (Inception: 15 days; Interim: 2 months; Draft: 4 months; Final: 6 months), date of initiation: 7 January 2025, likely date of completion: December 2026.

Activities completed (Jan–31 Mar 2025): inception report submitted detailing scope, objectives and data plan; methodological design finalised around a Composite Education Index (CEI) with indicator shortlist and weighting strategy; data compilation plan confirmed (DISE/U-DISE, NSSO rounds, ASER, PLFS, budget documents); RA roles assigned across quantitative, budgetary and policy streams; preliminary analytical workflow and per-student spending scenario simulations prepared.

Status (31 Mar 2025): Project formally awarded and work initiated; inception materials and methodological foundations established and available for internal review. (Note: a subsequent administrative decision to withdraw the contract occurred in late April 2025; that development is documented separately.) Key outputs available / to be archived: Inception report (full text and indicator list), datasets checklist, preliminary CEI specification, annotated bibliography and task assignments for RAs. Work done is being developed independently; see below.

'Household Out-of-Pocket Expenditure and the Rise of Private Schooling in India: Patterns, Drivers and Policy Options', individually initiated, date of initiation: March 2025, likely date of completion: December 2026.

Dr. Veena Naregal
Professor

This 18-month, self-initiated study examines recent decades' emerging patterns of household out-of-pocket expenditure (OOPE) on school education in India and the ways private sector provision—from elite and unaided private schools to low-cost private schools (LCPS), tuition markets and PPP arrangements—shapes affordability, access and learning equity. Working exclusively with existing secondary sources (NSSO unit rounds 64th–75th, DISE/U-DISE, ASER/NAS, state and central budget documents, and policy reports), the project adopts an interdisciplinary, mixed-methods design that emphasises descriptive, distributional and institutional analysis rather than heavy econometric identification. Quantitative work will document trends in OOPE (in real terms and as share of household expenditure), incidence across income deciles and social groups, and state-level heterogeneity; simple decomposition tabulations will attribute OOPE growth to enrolment shifts versus per-pupil fee increases. Complementary process-tracing and documentary policy analysis will situate observed patterns within post-2000 reform trajectories and the aims of the RTE, and two to three state vignettes will illustrate institutional drivers (regulation, funding priorities, market responses). The study draws on the political-economy traditions of Weiner and Blaug to interpret long-run fiscal and policy choices that condition contemporary outcomes. Findings will be framed as robust descriptive evidence and institutional explanations, not causal claims.

'Food (In)Security and Precarity of Migrant Workforce: Digital Public Infrastructure and Emergent Welfare Frameworks in Post-COVID India', partly supported through ICSSR OH-31 grant, date of initiation: March 2025, likely date of completion: May 2026.

This mixed-methods project examines the implementation of Aadhaar-enabled PDS (AePDS) and the ONORC scheme across key migrant-sending and receiving states. It focuses on whether digital governance enhances or hinders access to food security for internal migrants. The project analyses transaction data across six states (Delhi, Karnataka, Maharashtra, Bihar, Odisha, UP), combined with fieldwork interviews with migrant workers, local officials, and PDS administrators in three key migrant receiving states (Karnataka, Maharashtra, Bihar)

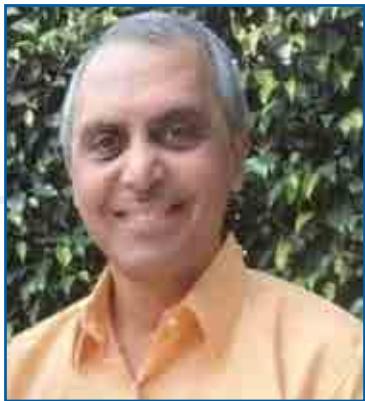

'Labour Market Outcomes, Labour Reform Trajectories, Share of Informal Employment: A Comparative Analysis of Development Strategies (1950s–2000s)', partly supported through ICSSR OH-31 grant, date of initiation: February 2025, likely date of completion: December 2026.

This project traces how educational policy choices shaped labour market structures and the persistence of informal employment across selected Asian, African and Latin American economies from the 1950s to the 2000s. Anchored in Deepak Nayyar's *Asian Transformations* and drawing on Chang, Guy Standing and Partha Chatterjee, it examines how colonial legacies, state-led interventions and development strategies produced divergent trajectories. State-led

सत्यमेव परमो धर्मः

universal education in China enabled skill-based industrialisation, while uneven educational outlays in India contributed to a dual economy dominated by informality. Country cases (e.g., Bangladesh, Vietnam, Malaysia, Indonesia, Nigeria, Egypt, Brazil, South Africa) are used to interrogate links among education spending, labour-law reform, and informal employment. The interdisciplinary analysis combines historical political economy with policy and labour studies to explain structural continuity and change, and to derive lessons on how education and labour reforms can address precarity and promote more inclusive growth in middle-income contexts.

Dr. C.S.C. Sekhar
Professor

'Pradhan Mantri Kisan Samman Nidhi (PM KISAN): Problems, Prospects and needed improvements', funded by Ministry of Agriculture & Farmers Welfare, GoI, initiated in: January 2024, likely date of completion: August 2025.

PM KISAN is a flagship program of the Government of India and presently covers about 13 crore farmers. This study analyses the functioning of the program, constraints faced by the farmers and the needed improvements in the program, based on primary data collected from 3,800 farmer households across 19 states of India. The major findings of the study are that a major chunk of the PM KISAN assistance is being spent on agricultural and non-agricultural current expenditure, showing that the investible surplus with the farmers is quite low. More than 90 percent of the beneficiaries rated the overall performance of PM KISAN as satisfactory or better. However, 99 percent of the respondents desired an increase in the amount of financial assistance, showing that the current level of assistance is not adequate to meet the rising costs of farming.

agricultural current expenditure, showing that the investible surplus with the farmers is quite low. More than 90 percent of the beneficiaries rated the overall performance of PM KISAN as satisfactory or better. However, 99 percent of the respondents desired an increase in the amount of financial assistance, showing that the current level of assistance is not adequate to meet the rising costs of farming.

(with Bindiya Kumari), 'Exploring Continuum of Care in Postpartum IUCD Services in Delhi: Women's Experiences of Counselling, Insertion, and Removal', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study examines postpartum IUCD (PPIUCD) services in Delhi's maternity homes, focusing on counselling, insertion, and removal experiences. It uses qualitative and quantitative

Dr. Suresh Sharma
Professor

methods across 11 maternity homes, interviewing 55 women. The study explores counselling quality, informed consent, satisfaction, follow-up care, and financial burdens due to removal costs. Findings will reveal systemic patterns, reasons for early removals, and hidden out-of-pocket expenses, informing policy improvements under the National Health Mission for better counselling practices, equitable service delivery, and reduced financial barriers in postpartum contraceptive access.

(with Bindiya Kumari), 'Exploring Maternal and Child Health Indicators in India: A trend and Cause- Based Analysis 2010-2025', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study analyses maternal and child health trends across India from 2010 to 2025 using HMIS data. It focuses on indicators like antenatal care, delivery care, postnatal care, child malnutrition, and cause-specific mortality (maternal, neonatal child). Spatial analysis with GIS tools will identify regional mortality clusters, while trend analysis will assess intervention impacts. Findings will help evaluate national programs' effectiveness, identify persistent health burdens, and guide policymakers in designing targeted, evidence-based maternal and child health interventions, addressing inequalities, and promoting more effective, region-specific healthcare strategies.

(with Bindiya Kumari), 'Evaluation of Health Management Information System Data Quality in the Aspirational Districts of EAG states in India, funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2025, likely date of completion: January 2026.

This research evaluates the data quality of HMIS indicators in Aspirational Districts across EAG states, focusing on completeness, accuracy, internal, and external consistency. Using WHO's data quality frameworks and NFHS comparisons, the study analyses variations over 2015–2025. Spatial analysis identifies intra- and inter-district disparities. The findings aim to guide improvements in HMIS reporting practices, particularly where data quality challenges persist, enabling better monitoring of health programs. Policymakers can use these insights to enhance evidence-based planning, ensuring more reliable health data collection, reporting, and utilisation across India's underserved regions.

(with Priyanka Yadav), 'Exploring the Link Between Reproductive Health Outcomes and Risk of Non-Communicable Diseases Among Women in Urban Delhi', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion, January 2026.

This study assesses how adverse reproductive health outcomes influence non-communicable

disease (NCD) risks among women aged 25–55 in urban Delhi. Using a cross-sectional survey of 400 women, it explores associations between conditions like gestational diabetes, hypertensive pregnancy disorders, early menopause, and NCD risk factors (hypertension, obesity, diabetes). Data collected from UPHCs and communities will inform preventive strategies. The study highlights gaps in women's healthcare access and suggests integrating reproductive and NCD screening in primary care to enhance early diagnosis and gender-sensitive health interventions in urban settings.

(with Priyanka Yadav), 'Assessing Regional Inequalities and Variations in Caesarean Delivery Rates Across Indian States: An Exploratory Study', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This exploratory study analyses state-level variations in caesarean delivery (C-section) rates across India using NFHS data (2005–2021). It investigates socio-economic, demographic, and healthcare access determinants influencing C-section rates and explores urban-rural disparities. Regression and correlation analyses assess factors like income, education, and facility type. The study identifies regions with over-medicalisation or healthcare access gaps, offering policy recommendations to promote equitable maternal care, strengthen rural healthcare infrastructure, and regulate private sector practices, ensuring C-sections are performed appropriately based on medical necessity rather than systemic inequalities.

(with Priyanka Yadav), 'The Impact of Domestic Violence on Women's Reproductive and Maternal Health in India: Challenges in Healthcare Access and Policy Interventions', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study explores how domestic violence (DV) affects women's reproductive and maternal health outcomes in India, using NFHS-3, 4, and 5 data. It examines healthcare access barriers faced by survivors and evaluates gaps in policy interventions like the Protection of Women from Domestic Violence Act (2005). Through regression and trend analysis, it links DV to adverse maternal outcomes and identifies stigma, financial dependence, and systemic barriers as key access issues. Policy recommendations include strengthening healthcare systems, routine DV screening, legal aid integration, and expanding community-based awareness programs to support affected women.

(with Purva Bhalla), 'IPHS (Indian Public Health Standards) Compliance and Service Delivery Statistics: Evidence from ODK Tool Kit Assessment', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study assesses compliance of public health facilities with Indian Public Health Standards (IPHS) using ODK-based primary data across different facility tiers. It evaluates compliance on diagnostics, infrastructure, staffing, services, and governance. Statistical analyses reveal how IPHS compliance affects service utilisation, patient satisfaction, and operational efficiency. The study identifies systemic gaps and high-performing models, providing facility-wise scorecards. Findings offer actionable insights to policymakers for improving healthcare quality, ensuring equitable infrastructure development, enhancing transparency, and strengthening India's progress toward Universal Health Coverage and Sustainable Development Goals.

(with Purva Bhalla), 'The Cost of Wellness: A Data-Driven Analysis of Out-of-Pocket Healthcare Spending in Urban India', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study analyses patterns, determinants, and impacts of out-of-pocket (OOP) healthcare expenditure in urban India using NSS data. It estimates spending distribution across socio-economic groups and assesses catastrophic health expenditure risks using regression and inequality measures. Findings reveal financial vulnerabilities, particularly among lower-income groups. Comparative analyses between metro and non-metro areas identify disparities. Policy recommendations include strengthening health insurance coverage, improving public healthcare access, and regulating private healthcare costs to reduce financial stress and enhance healthcare accessibility for urban households.

(with Purva Bhalla), 'C-Section Deliveries in India: A Comparative Analysis Using HMIS and NFHS Data', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study examines national and state-level C-section delivery trends using HMIS and NFHS-5 datasets. It identifies socio-demographic determinants like maternal age, education, income, and facility type, influencing C-section rates. Disparities between the public and private healthcare sectors are analysed. Logistic regression and inequality measures assess over-medicalisation patterns. Findings offer insights into regulating unnecessary C-sections, strengthening public maternity services, and ensuring equitable access. Evidence-based recommendations will support policymakers and healthcare providers in promoting ethical, patient-centred maternal care practices across India.

(with Rahul Kumar) 'Optimizing Organ Supply Chain Management in Delhi: A Case Study of Challenges & Best Practices', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This case study analyses Delhi's organ supply chain management challenges, focusing on

transport, coordination, storage, and regulatory hurdles. Primary data from hospitals and key stakeholders will be collected. Using optimisation techniques like Mixed Integer Linear Programming (MILP), the study proposes models to minimise transport time and costs. It identifies systemic inefficiencies causing organ wastage and highlights best practices. Policy implications include strengthening inter-agency coordination, streamlining regulatory approvals, investing in specialised transport, and digital tracking systems to improve organ transplant success rates in Delhi.

(with Rahul Kumar), 'Geospatial Mapping of Maternal and Child Health Trends in India: A District-Level Analysis Using HMIS Data', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study uses HMIS data and GIS tools to map district-level trends in maternal health care utilisation from 2015 to 2022. It analyses indicators like antenatal care, institutional deliveries, and newborn health, employing LISA techniques to identify spatial disparities. The study tracks improvements or declines over time, pinpointing regional clusters needing intervention. Insights guide resource allocation, infrastructure upgrades, and targeted awareness programs, supporting better maternal health outcomes and promoting more equitable healthcare access across underserved Indian districts.

(with Rahul Kumar), 'Spatial Analysis of Stillbirths Rates in India: Insights from HMIS Data', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study examines spatial patterns of stillbirth rates across Indian districts using HMIS data (2022–2025) and NFHS indicators. It calculates stillbirth rates, identifies regional hotspots and coldspots using Moran's I and LISA analysis, and correlates maternal health indicators like anemia, ANC coverage, and BMI, with stillbirth trends. Findings highlight persistent high-burden regions needing targeted interventions. The study supports district-level health planning under NHM and India's Newborn Action Plan, emphasising the need for data-driven improvements in maternal care quality and service delivery.

(with Vandana Sharma), 'Climate Vulnerability and Healthcare Disruption in Assam: Mapping Flood-Induced Facility Closures and Access Gaps', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study investigates flood-induced healthcare disruptions in Nalbari district, Assam. Using geospatial mapping, facility surveys, and interviews with health workers, it documents service disruptions, infrastructure vulnerabilities, and adaptive strategies. Logistic regression

identifies facility characteristics linked to operational closures. Findings inform climate-resilient health planning, structural upgrades, and emergency preparedness improvements at the district and state levels. The study highlights the urgency of integrating climate vulnerability into healthcare infrastructure development under the National Health Mission and disaster risk reduction frameworks.

(with Vandana Sharma), 'Certification Versus Capacity: Investigating Patient Load and Quality Assurance in Indian Public Health Facilities', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study explores the relationship between patient load and quality certification (Kayakalp, NQAS) across public health facilities in India. It uses HMIS service data and certification records to assess whether low-volume facilities are disproportionately certified compared to high-burden ones. Regression analysis and qualitative interviews with administrators identify challenges. Findings reveal systemic biases, suggesting that quality programs need to better accommodate high-load facilities. Policy recommendations include revising certification criteria and ensuring equitable quality improvement support for facilities with heavy patient volumes.

(with Vandana Sharma), 'Development of a Contextualized Neonatal Risk Prediction Model Using Routine Data from Special Newborn Care Units in India', funded by Ministry of Health and Family Welfare (MoHFW), date of initiation: April 2024, likely date of completion: January 2026.

This study develops a neonatal risk prediction model based on routine SNCU admission data in India. Using logistic regression and cross-validation techniques, it identifies key clinical predictors and constructs a risk score classifying neonates into low-, moderate-, and high-risk categories. The model aims to improve early identification and triaging of high-risk neonates. Findings contribute to standardising clinical decision-making in SNCUs, supporting India's efforts to reduce preventable new-born deaths under SDG 3.2. Future integration into digital dashboards can enhance neonatal care efficiency nationwide.

TRAINING PROGRAMMES

IEG has functioned as a centre for specialised teaching and training since its inception. The following training programmes were conducted by the Institute:

(a) Indian Economic Service Training Programme held during the year 2024-25

From April 2024 to March 2025, the Institute conducted the Probationary Training Programme for the IES Officer Trainees of the 2024 Batch. This training was done in two phases. Phase I was from August 5, 2024, till September 20, 2024, and Phase II was from December 30, 2024, till February 21, 2025. The training programme was inaugurated by Dr. V. Anantha Nageswaran, the Chief Economic Adviser, Department of Economic Affairs, Ministry of Finance; Dr. Anuradha Guru, Economic Adviser, Department of Economic Affairs, Ministry of Finance. Dr Nageswaran delivered the inaugural address and Dr. Guru, the introductory remarks on training program. The Valedictory programme for this batch was held on February 21, 2025, and the Chief Guest was Dr. Anuradha Guru, the Economic Adviser.

IES Batch 2024- Inaugural Session

The training was successfully conducted with lectures from the IES faculty, other invited and guest faculty, and senior IES officers. Senior officers like Mr. Rajiv Mishra, Mr. Anupam Mitra, Ms. Kokila Jayaram, Mr. Antony Cyriac, Mr. Deepak Rao, Ms. Rosemary K. Abraham, Ms. Reetu Jain, Ms. A. Srija, Mr. Syed Zubair Husain Naqvi, and Ms. Monica Thind delivered

lectures and shared their experiences with the IES Officer Trainees. A total of 17 IES Officer Trainees attended the programme. During the probationary programme, Officer Trainees conducted research on contemporary economic policy issues under the guidance of IES Faculty and submitted seminar papers.

IES Batch 2024- Validictory Session

GLIMPSES OF KEC 2024

IEG CONFERENCES, WORKSHOPS, SEMINARS AND LECTURE SERIES

4.1

KAUTILYA ECONOMIC CONCLAVE (KEC) – 2024-25

1. IEG and the Ministry of Finance, Government of India, organised the Kautilya Economic Conclave on 'THE INDIAN ERA' on October 4-6, 2024.
2. Kautilya Economic Conclave 2024- Post Event Interaction with Prof. Anne Krueger and Prof. Amiyatosh Purnanandam on October 7, 2024, at Delhi School of Economics.

4.2

IEG WINTER SCHOOL

IEG's First Winter School on Causal Inference was conducted from November 25 to December 4, 2024, at the Institute of Economic Growth (IEG).

4.3

IEG BROWN BAG SEMINAR SERIES

1. "Mothers Left Out, Daughters Left Behind". Speaker – Chinmayi Srikanth, IEG- CDE on May 9, 2024.
2. "The Employment Status and Wage Gap of Youth Engaged in Decent and Non-Decent Work in India". Speaker – Gautam Kumar Das, IEG on May 15, 2024.

4.4

IEG SEMINARS SERIES

1. "Learning from Diversity: "Jati" Fractionalization, Social Expectations and Improved Sanitation Practices in India". Speaker – Upasak Das, University of Manchester, UK on May 10, 2024.
2. "Distributional Effects of Agricultural Interventions in India". Speaker – Sagar Saxena, EGC, Yale University on July 5, 2024.
3. "The Effects of Mid-level Providers on Elderly Mortality: Evidence from India's Large-Scale Primary Healthcare Expansion". Speaker – Patrick Agte, EGC, Yale University on July 12, 2024.

GLIMPSES OF KEC 2024

4. "From Particles to Climate: Reflections on Urban Airs". Speaker – Awadhendra Sharan, CSDS on July 19, 2024.
5. "Environmental Performance and Capital Markets". Speakers – Shreekant Gupta, Indraprastha Institute of Information Technology, and Bishwanath Goldar, IEG on July 26, 2024.
6. "Does it Pay to be Skilled? The Changing Dynamics of Skill Premium in Post-globalisation India". Speaker – Mrinalini Jha, O.P Jindal Global University on August 29, 2024.
7. "To Store or not to Store- Evidence on Farmer Expectations and Returns to Storage in India". Speaker – Sudha Narayanan, IFPRI on September 6, 2024.
8. "Transforming Rural Economies through Tertiary Education: Evidence from India". Speaker – Abhiroop Mukhopadhyay, ISI-Delhi on September 20, 2024.
9. "Building Evidence to Support Nutrition Policies and Programmes in India Through Partnership". Speaker – S. K. Singh, Former Director and Senior Professor, IIPS on September 27, 2024
10. "Climate Shocks, Domestic Violence, and the Protective Role of Climate-Resilience Projects". Speaker – Nidhiya Menon, Brandeis University on October 18, 2024.
11. "Small is Not Always Beautiful: Firm Size and Female Employment". Speaker – Kanika Mahajan, Ashoka University on November 8, 2024.

SUKHDEEP SINGH

Lectures/Teaching Assignments

Teaching:

The lectures were delivered to the Indian Economic Service Trainee Officers on topics related to innovation and competition, and *NPAs and their Macroeconomic Impacts*.

The lectures were delivered during IEG's First Winter School and covered topics in probability theory, regression analysis, and the use of categorical variables, complemented by hands-on sessions.

Organizing Activities:

The First IEG Winter School on Causal Inference from November 25, 2024, to December 4, 2024.

Workshops/Conferences organized

A two-day workshop titled “Finance and Markets” organized under the HDFC Bank and Tata Chair on April 15-16, 2024.

“Gender and Growth Gaps in India – Research and Policy Dialogue 2024” organized in collaboration with Yale Inclusion Economics and Inclusion India Economic Centre on August 8, 2024.

“Women in Leadership in Economics (WiL)” workshop organized in collaboration with Yale Inclusion Economics and Inclusion India Economic Centre on August 9, 2024.

“Towards a Resilient Economy” Symposium organized on December 6-7, 2024.

“Building a Resilient Economy: The Challenges of Inequality” Panel Discussion organized on December 7, 2024.

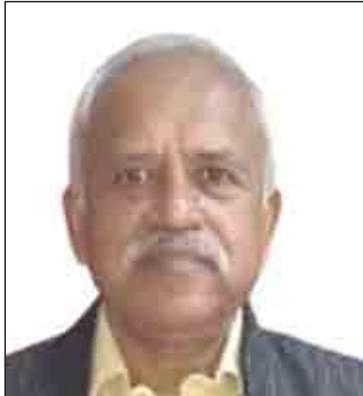

Paper/Seminar/Lecture/Conferences

Presented a paper titled “Changing Distribution of Leverage and Formation of 'Clubs' in Indian Corporate Firms during 1991-2021: A Nonparametric Approach” in the conference organized by the Asia Economic Community Forum on November 7, 2011.

Served as a discussant of a paper titled “How Oil Prices Impact the Taiwanese Economy: Evidence from the Stock Market”, authored by Willem Thorbecke from the Research Institute of Economy, Trade and Industry, Japan.

Lectures/Teaching Assignments:

Made a presentation with Prof. Shreekanth Gupta at an IEG Seminar on “Environmental Performance and Capital Markets: Evidence from India”, held on July 26, 2024.

Made a presentation at the Kautilya Economic Conclave, 2024. Session on the “Importance of Statistics in Policy Formulation”.

Lectures/Teaching Assignments:

Visiting Professor, Department of Sociology and Social Anthropology, Ashoka University, from March 2024-May 2025. I taught 2 courses per semester over these 2 semesters.

Journal: *Contributions to Indian Sociology*

Worked as Editor of the Journal *Contributions to Indian Sociology* housed at IEG

Dr. Rita Brara Mukhopadhyay

(Non-Resident Senior Fellow)

Chaired the Fourth CIS_IEG_SAGE Lecture delivered by Professor Kath Weston at the India International Centre held on 22 February, 2025.

Projects

Completed a project titled “Thinking Post-Pandemic Politics Through Pandemic Things: Masks, Oxygen, Corpses and More” under the ICAS: MP rubric “Metamorphoses of the Post-Pandemic Political”. the prism of the COVID-19 pandemic.” Paper read at the SOA Colloquium, Ashoka University on April 12.

Workshops/ Paper Presentations

Organized a two-day workshop on 9-10 May, 2024 titled the 'The COVID-19 Pandemic: Insights from the Inside of Micro-Environments' with participants from India, Tel Aviv University and LMU at the Rachel Carson Center for the Study of Environment and Society at Munich, Germany.

The Workshop was supported by ICAS-MP, an Indo-German research collaboration of six Indian and German institutions.

I read a paper titled “Pandemic Insights from Inside Delhi's Gurdwaras”.

सत्यमेव परमो धर्मः

Co-chaired a Workshop with Professor Birgit Schneider, University of Potsdam, and organized a workshop titled "The COVID-19 Pandemic: Insights from the Inside of Micro-Environments" at the University of Potsdam, Potsdam, Germany on 22 May, 2024, I presented a paper titled "Pandemic Insights from Inside Delhi's Gurdwaras".

Read a paper titled "Weighing Her Down: Multi-Stranded Politics and Water Precarity in a Delhi Slum (Kusumpur Pahari)" organized at the Symposium organized by the Käte Hamburger Centre for Apocalyptic and Post-Apocalyptic Studies (CAPAS) titled "Precarious Water Futures" India International Centre, Delhi on November 14.

Read a paper titled "Gurdwaramentality: The Governmentality of Gurdwaras seen through the prism of the COVID-19 pandemic." Paper read at the SOA Colloquium, Ashoka University on April 12.

PROFESSORS ON PROJECT: CONTRIBUTION AND ACTIVITIES

PROJECTS, AWARDS, PUBLICATIONS, LECTURES AND MEMBERSHIPS OF
DISTINGUISHED BODIES

Dr. Bina Agarwal
Professor on Project

Ongoing Projects:

'Group Farming and Agricultural Transformation', funded by the International Balzan Prize funds held at IEG.

Agriculture in developing countries is plagued with multiple challenges today, especially those related to small holdings, land fragmentation, and tenure insecurity. Some 86 percent of farms in India, and 84 percent globally across 111 countries cultivate under two hectares. Most of these farms are economically unsustainable and environmentally challenged by climate change. Existing policies are focused mostly on price incentives and technologies, missing the key ingredient of institutional change.

This project focuses on the institutional innovation of group farming, wherein small farmers voluntarily pool their resources (land, labour, capital and skills) to create a medium-sized enterprise, and cultivate it jointly, sharing costs and benefits. It examines whether group farming can enhance farmer productivity and profitability, and can also empower disadvantaged farmers, including women.

The empirical analysis and field work on this project, which covers several countries—including India, France, Romania, UK and Canada—has largely been completed. It is now being woven into a book which covers this theme conceptually and historically as well as empirically, across countries and continents. It takes examples of successes and failures from both democratic countries and former socialist countries, to extract lessons and design principles for successful adaptation and replication elsewhere.

'Land Leasing: The Potential Role of Facilitating Intermediaries', funded by the International Balzan Prize funds held at IEG.

This project constitutes a field experiment to test if the presence of a local intermediary can

सत्यमेव परमो धर्मः

facilitate land leasing agreements in villages. Potential benefits of such an intervention would be bringing fallow land into cultivation and thus increasing village agricultural productivity, while also reducing the transaction costs of arriving at lease agreements. The experiment is being undertaken in two villages of West Bengal.

The project, which began in January 2022, includes base line surveys in both villages; embedding a local intermediary to facilitate agreements (the person keeps a daily diary to record the process of arriving at an agreement); and follow-up resurveys to assess the effect of the intervention. Resurvey fieldwork is currently ongoing.

International Awards/ Recognition

March 2025, received the First Global Inequality Research Award 2024/25, given by the Paris School of Economics (PSE) and Sciences Po, France.

https://www.youtube.com/watch?v=bbZSAK_h5YA

2024/25, named in Stanford University's list of top 2% Scientists 2024, in both "Career-Long Achievement" and "Single Year Achievement" categories.

Teaching

MSc in Development Studies, 2024/25 academic year, taught course on "Gender Inequality: Theory and Evidence" as Professor of Development Economics and Environment, GDI, University of Manchester (part time).

Conferences, Symposia Organised at IEG

Organised and moderated an IEG-IIC Panel: “Building a Resilient Economy: The Challenges of Inequality”, December 7, 2024. Available on Youtube: <https://youtu.be/vQSGY5AvYS4>.

Panelists: Dr. Stephane Hallegatte, World Bank, Washington DC; Prof. E. Somanathan, Indian Statistical Institute, Delhi; Dr. Radhika Khosla, Oxford University, UK; Prof. Ashwini Deshpande, Ashoka University.

Co-organised with IEG colleagues, a technical symposium on “Towards a Resilient Economy”, Institute of Economic Growth, Delhi, December 6-7, 2024.

Keynote/Special Lectures

“Hidden Inequalities: Visible Outcomes: A Gender Lens”, Paris School of Economics, France, March 19, 2025.

Public event, “A Feminist Lens on Forests and Fields: A Conversation with Bina Agarwal”, Paris School of International Affairs at Sciences Po, Paris, March 18, 2025.

Research talk on “Can Indigenous Political Representation Improve Forest Conservation? India's Experience”, CIRED (International Centre for Research on Environment and Development), Paris, March 18, 2025.

Lecture on “Can Indigenous Political Representation Improve Forest Conservation? India's Experience” organised by the Conservation Research Institute (CRI), Centre for Environment, Energy and Natural Resource Governance (CEENRG) and Centre for Resilience and Sustainable Development (CRSD), Department of Land Economy, University of Cambridge, UK, February 7, 2025.

University of Manchester, GDI Lecture Series on “Do Courts Grant Indian Women Their Inheritance Shares?” February 19, 2025.

Keynote presentation on “Group Farming: A Transformative Institution” at UN Agri-food symposium organised by FAO, IFAD, and World Bank, UN, Delhi, January 15, 2025.

Vidhi Inaugural Lecture, “Do Courts Grant Women Their Inheritance Claims?”, Vidhi Centre for Legal Policy, IIC & CSH, Delhi, October 30, 2024.

Plenary panel presentation on “Beyond the Family: The Transformative Potential of Women's Group Farming”, IAAE: International Association of Agricultural Economics Conference, August 6, 2024.

सत्यमेव परमो धर्मः
Keynote address on “Rethinking Agriculture”, School of Government and Public Policy, O.P. Jindal Global University, June 6, 2024. <https://youtu.be/PebBHSioxVk>

Opening Plenary, “Reflections on Four Decades of Research and Advocacy”, NCAER, Delhi, September 25, 2024.

Conference Talks

Presented two papers online at the Annual Conference of the International Association of Feminist Economics, July 3-4, 2024 in Rome: Session on “Representation, Inclusion and Empowerment in the Digital Age; FAO panel on “Accelerating the Feminist Agenda in the Agrifood System”.

IAAE, Delhi, presented paper at 32nd Conference of the International Association of Agricultural Economics, on “Does the Landowner's Gender Affect Self-cultivation and Farm Productivity?”, August 7, 2024.

Fellow of Distinguished Societies, Institutions

Fellow, International Science Council, 2022-till date

Honorary Fellow, Murray Edwards College, University of Cambridge, elected 2022- till date

Accademia Nazionale dei Lincei, Italy, elected International member, 2016- till date

The World Academy of Sciences (TWAS), elected member, 2018- till date

International Economic Association, appointed Lifetime fellow, 2018- till date

Indian Association for Agricultural Economics, appointed lifetime fellow, 2016- till date

Member, Editorial Boards of Academic Journals:

World Development; (2022-); Ecological Economics (2022-); International Labour Review (Geneva); Journal of Human Development and Capabilities (New York); International Journal of the Commons (The Netherlands); International Journal of Agricultural Resources, Governance and Ecology (Oxford); International Journal of Development Issues (Australia); Women and Politics (Washington DC); Feminist Economics (Boston/Amherst); Journal of South Asian Development. Co-Editor: *Economia Politica* (2017- till date)

Member, Government Committees:

Member, Expert Committee on Gender Statistics, Ministry of Statistics & Programme Implementation, November 2024-2025.

INFRASTRUCTURE

12.1

THE C.H. HANUMANTHA RAO LIBRARY

Library

The C. H. Hanumantha Rao Library, IEG contains a specialised collection of books and documents in the social sciences, with an emphasis on development and planning. It caters mainly to the needs of faculty research and training. It also has micro documents, serials and official publications brought out by research organisations, corporate bodies, international organisations and their allied agencies, universities, and the central and state government departments and their research and evaluation cells.

At present, the library has about 1,49,507 accessioned documents (as on March 31, 2024), including books, monographs, workshop papers, conference proceedings, and about 3,500 statistical serials in the social sciences containing statistical information on India and other countries. It also has micro documents such as Institutional Research Reports, working papers and annual reports of companies, government departments and other bodies. In addition, it has a stock of 24,000 back volumes of journals of 1,250 titles. The library receives 187 journals of which it obtains 67 journals on subscription, 28 journals in exchange and 92 journals in gratis. The library exchanges IEG's research output and publications (including its journal,

सत्यमेव परमो धर्मः

Contributions to Indian Sociology) with similar institutions in India and abroad.

The library has a complete set of Census of India reports commencing from 1872. For the period from 1872 to 1951, the census data is in microfiche format and from 1951 to 2011, in hard copy. For 1991, 2001 and 2011, the census is also available in CDs. It also has a unique collection of old manuscripts and documents which it inherited as part of the UNESCO collection. The IEG Library also has an impressive collection of important datasets and CDs, including those of the ASI, NSS, World Bank, IMF, and the ADB. Its total CD-Rom collection numbers 1,396 as on 31st March, 2023.

The IEG library has digitised IEG Working Papers and IEG Discussion Papers. All these IEG research papers (full text) may be accessed from the IEG Intranet. The library has also developed a data centre and has subscription of many important databases like CEIC, Economist online, CMIE- CPDx (Consumer Pyramids Dx), etc.

Presently, the library is connected with the University of Delhi's LAN systems and is a member of DELNET. This allows access to many online resources, journals and databases like Taylor and Francis, Oxford University Press, Cambridge University Press, Sage Online, Econlit, JSTOR, Science Direct, and EBSCO.

The IEG library has conducted several user orientation and training programmes for our faculty and researchers. During the 2023-24 we had organised EBSCO database and CMIE user training for IES Probationers, the faculty and research staff. Apart from the above, the library also provides internship training for short durations in the field of library and information science for students from institutions such as the University of Delhi.

12.2

COMPUTER UNIT

Computer Centre:

IEG's Computer Centre is indeed a comprehensive facility with high-end computing and network resources, designed to meet the diverse technological needs of its users. With a user base of approximately 170 users, including faculty members, researchers, administrative staff, doctoral students, IES probationary officers, and affiliated visitors, the centre plays a pivotal role in supporting the institute's academic and administrative functions.

Infrastructure and Connectivity:

The backbone of the centre is its local area network (LAN), which is powered by the HP Bl460c

Computer Unit

G7 blade server. Additionally, the acquisition of a high-speed fibre link from the National Knowledge Network (NKN) through Delhi University ensures fast and reliable access to over 100 e-resources, including journals and online databases. To mitigate internet failures and ensure uninterrupted connectivity, IEG has installed a 300Mbps connection and two additional 250Mbps internet links, complemented by an optical fibre and unified Wi-Fi system that covers the institute's offices, hostel, and staff quarters. Furthermore, our network security is strengthened with firewall and antivirus software.

Hardware and Facilities:

Faculty members and senior administrative staff are provided with PCs and laptops in their offices. High-speed desktop/heavy-duty LAN printers with ADF facilities are available in key units such as the Computer Unit, the Library, the Central Office, and the Accounts Section. Attendance is automated using a biometric attendance system. The IES training room is equipped with modern amenities such as a digital podium, a wireless PA system, and online lectures deployment system, facilitating seamless training sessions and presentations.

Software and Databases:

The Institute boasts an extensive software library, encompassing advanced applications and econometric packages, including Windows 11, Windows 10, MS Office 2021, MS Office 365,

Adobe Acrobat, Eviews 12, Limdep 10.0, Stata 18.0, Stata 17.0, Stata 16.0, Stella 5.0, Vensim 5.5 (DSS), GAMS 4.0, MFIT 4.0, MLwiN, RATS 6.0, ArcGIS 10.1, SPSS 16, SPSS 28, Diet Cal-11, Corel Draw 17, Tally, Visual pay, Seqrite(antivirus), etc. Network and online databases such as Prowess, DSpace, and Koha, further augment research capabilities.

Web Infrastructure:

The IEG website, powered by a Content Management System (CMS), offers a feature-rich platform for faculty, research units, and administration to easily update information. It includes an online job portal, and an events manager.

Backup Systems and Additional Facilities:

The Computer Centre also features a reliable 2Nos 20 KVA UPS backup system, providing uninterrupted power supply to ensure smooth operations during any power interruptions.

Lastly, the A.M. Khusro Room, V.K.R.V Rao Room, and the PRC and AMB Conference Rooms are equipped with the latest ICT infrastructure for hybrid events, while the Audio-Visual Room, equipped with VHF audio conferencing capabilities, facilitates web conferencing, live interviews, presentations, and demo programs, fostering interactive communication and knowledge sharing. Overall, IEG's Computer Centre stands as a vital resource hub, leveraging cutting-edge technology to support academic excellence, research endeavours, and administrative efficiency within the institute.

12.3

GUEST HOUSE AND OFFICER'S HOSTEL

The IEG Guest House and Hostel caters primarily to the needs of participants of various training courses and orientation programmes conducted by the Institute, such as probationers and serving officers of the IES, the Indian Audit and Accounts Service, participants in conferences held at the Institute, and IEG's own guests.

The hostel is governed by a management committee chaired by the IEG Director and convened by the Warden, who is usually a senior professor of the Institute and responsible for the hostel's smooth functioning.

Sukhdeep Singh is presently the Warden, IEG Hostel. Dr. Oindrila De was his predecessor.
