The First Annual Workshop on Finance and Markets

Organised Under

The Tata Chair of Information Technology and The HDFC Chair of Banking and Finance

Institute of Economic Growth, Delhi

April 15-16, 2024

Theme of the Workshop

The Tata Chair of Information Technology and the HDFC Chair of Banking and Finance in the Institute of Economic Growth (IEG) are delighted to jointly host the First Annual Workshop on Finance and Markets. This workshop is a first of its kind initiative that provides a forum for academic and policy discussions on both conventional and emerging issues of industrial organisation and financial development.

Recent years have witnessed significant shifts in the way production has been organised and financed. Data abundance and cost-effective access to communication technologies now shape the behaviour and strategies of firms, households and individuals. This international workshop brings together top researchers to present research related to banking and financial development, market structure and industrial organisation. Specifically, the discussion will focus on the growth and borrowing pattern of firms, banking operations, E-commerce, the digital economy, environmental governance, and multi-market competition.

The workshop is going to be held over two days: April 15-16. A set of 8 papers will be presented including two Keynote Lectures by internationally reputed scholars.
