## Introduction

The Ministry of Health and Family Welfare (MoHFW), Government of India, has assigned the Population Research Centre (PRC) the responsibility of field monitoring of the key components of the National Health Mission (NHM) State Programme Implementation Plan for 2024-25. For further planning and resource allocation in any area, it is anticipated that a timely and systematic assessment of the essential NHM components is important. This report, compiled by the Population Research Centre, Institute of Economic Growth (PRC-IEG), Delhi, presents the key findings from the field monitoring of NHM components in Deoghar district, Jharkhand. The report emphasizes on the important findings regarding the health needs at the district and sub-district levels so that the concerned authority may be directed to prioritize each area using the strategy most suitable for achieving the objectives of the National Health Mission.

Location Map of Deoghar District

The findings are based on field visits conducted by the PRC-IEG team, comprising Dr. Priyanka Yadav and Ms. Pragya Shree to various public healthcare facilities. These include District Sadar Hospital, CHC Jasidih; CHC Sarawan; PHC Baghmara; PHC Kunda; PHC Kushmil; UPHC Kalyanpur; AAM SHC Kenmankathi; AAM SHC Bandajori; AAM SHC Sonarathari and UAAM Kovridih.

During these visits, the team engaged with the Nodal programme officers, Civil Surgeon, Medical Officer-in-Charge (MOIC), Medical Staff (MOs, CHOs, ANMs, etc.), Community healthcare providers (ASHAs, Anganwadi workers, etc.), and other support personnel. These discussions were conducted to evaluate the facilities' strengths and identify challenges in healthcare service delivery.

## *Key Findings and Observations from the District:*

- ❖ **Lack of Human Resource and Shortage of Equipment's:** There is often a deficit of trained medical staff willing to work in rural settings, leading to understaffed facilities. The district lacks sufficient medical officers and specialists at the PHC and CHC levels. To meet demographic requirements, more ASHAs are needed, despite AAM SHCs having an adequate workforce. Additionally, most facilities do not have functional X-ray and USG services.
- ❖ **Infrastructure Maintenance and Civil work:** For a longer period of time, the facility's civil work requirements are ignored and unaddressed. Many rural health facilities lack adequate infrastructure, which hampers the delivery of quality healthcare services. Most of the facilities do not have proper electricity. Most of the facilities don't have proper power back up.
- ❖ **Public health financing:** Funds are allotted periodically to all the facilities as per the guidelines. The facilities utilize the fund to the maximum. The fund utilization percent is above 95% among all the facilities.
- ❖ **AAM Services:** The Sub Centres and Primary Health Centres have been converted to Ayushman Arogya Mandirs (AAM). AAM SHCs successfully deliver majority of the Comprehensive Primary Healthcare (CPHC) packages. Majority of the AAM SHC are also not delivery points. However, due to a paucity of medical officers in PHCs, services are confined to basic care such as regular births, family planning, and OPD, with just a few CPHC packages being implemented.
- ❖ **NCD Screening:** NCD screening is provided at all levels of care, including CHC, PHC, SHC. PHCs and SHCs primarily treat hypertension and diabetes. Oral, Breast Cancer are only screened and suspected cases are referred to higher facilities whereas in case of Cervical cancer in absence of proper training and infrastructure it remains unscreened at most of the facilities.
- ❖ **Drugs and Diagnostics:** Drug availability is generally satisfactory across all visited facilities. Although some medicines were temporarily out of stock at CHC and PHC levels, they were promptly restocked. Essential medicines were fully available at all levels.

# DEOGHAR, JHARKHAND

- ❖ **Status of Maternal Health and Health Outcomes:** Jharkhand, identified as a Low Performing State (LPS) under JSY due to historically low institutional delivery rates, has been a focal point for maternal health interventions. The state has adopted the Reproductive, Maternal, Newborn, Child, and Adolescent Health (RMNCH+A) strategy, which addresses major causes of mortality and morbidity among women and children. This strategy ensures a continuum of care across various life stages, emphasizing the importance of quality maternal health services. “*Matri Vahan*” provides ambulance services to all the pregnant women. Family planning services are widely utilized, with oral pills and Condoms being the most common method. However, the acceptance of IUCD and PPIUCD is satisfactory in the district.
- ❖ **Child health and Immunization:** The district is improving in child health and nutritional indicators, with good immunization coverage. Despite being a tribal area, public awareness of immunization and nutrition is relatively high. During the festival season “*Saawan*” as most of the staff are occupied in the temple duty immunization get hampered.
- ❖ **Data reporting:** Data reporting is consistently updated across all portals (HMIS, NCD, HWC, IHIP, DVDMS, FPLMIS, and Nikshya). However, the quality of physical reporting is inconsistent and needs improvement to align with digital reporting standards.
- ❖ **Teleconsultation services:** Teleconsultation services are available at some of the facilities. The hub of teleconsultation is the CHC. However due to lack of staff, the utilization is low. Major cases of teleconsultation include fever, hypertension, skin disease, cough etc.
- ❖ **Quality Programs:** Quality programs such as Kayakalp, NQAS, SUMAN and LaQshya are actively implemented in the district. However, the district lags in the parameters. Several facilities are NQAS and Kayakalp certified.
- ❖ **Community Interaction:** Community feedback shows a significant reliance on public health facilities. However, there is need to upgrade the facilities for better services. There is an utmost requirement of more District Hospital or Medical College in the district as patient from near by districts also come to the medical college, thus, creating pressure on the limited resources.

## *Recommendations:*

- 1. Providing Human Resource as per IPHS norms:** In order to provide better services sanctioned amount of HR should be deployed. The issue of shortage of Specialist and Medical Officers should be addressed.
- 2. Upgradation of the facilities:** There is a high urgency of upgrading the infrastructure of the facilities of the district. The basic infrastructure such as water, electricity, boundary wall, toilet facilities should be available at the facility.
- 3. Training on Complete CPHC Package:** The CHOs and MOs have not received all the complete 12 package training, most of the staff have received only 7 or 8 modules only. Therefore, in order to strengthen the PHCs and SCs there is need to train all the staff with complete modules.
- 4. Awareness on Family Planning:** There is a requirement of bringing more awareness about the family planning methods in the district. Prevalence of IUD and PPIUCD is very less and there is a need to increase it.
- 5. Improving Delivery Services:** Most of the facilities are capable of handling delivery services. There is need to strengthen the staff by providing proper training and start the services
